JULY 6, 2004

FOR IMMEDIATE RELEASE

COLUMBIA MAN SENTENCED FOR MANUFACTURING METH

JEFFERSON CITY, Mo. – Todd P. Graves, United States Attorney for the Western District of Missouri, announced that a Columbia, Mo., man was sentenced in federal court today for manufacturing methamphetamine.

Chadwick Wayne Acison, 27, of Columbia, was sentenced by U.S. District Judge Scott O. Wright this morning to eight years and four months in federal prison without parole.

On Jan. 27, 2004, **Acison** pleaded guilty to manufacturing 50 grams or more of methamphetamine.

Three co-defendants have also pleaded guilty in the federal indictment and await sentencing. On Jan. 27, 2004, **Sharon L. Baker**, 53, and **Laurie Jean Loftus**, 23, both of Columbia, pleaded guilty to charges related to manufacturing methamphetamine. On March 16, 2004, **Jeffrey Gayle Merritt**, 36, of Columbia, pleaded guilty to manufacturing 500 grams or more of methamphetamine.

Acison was arrested on Feb. 26, 2003, when law enforcement officers were called to the home of **Baker**, **Acison's** mother, because they encountered a man running from the area who had an order of protection pending against him that prohibited contact with **Baker**. As the officers stood at the sliding glass door of **Baker's** apartment, they smelled a strong odor of ether and chemical solvent consistent with the manufacture of methamphetamine. Officers also saw **Acison's** car parked near the apartment. Inside the car were two cans of starting fluid and a blister pack of ephedrine, items used in the production of methamphetamine.

While executing a search warrant of **Baker's** apartment and **Acison's** vehicle, Graves said, officers found methamphetamine and items consistent with the manufacture of methamphetamine. While executing a search warrant of **Acison's** trailer, officers recovered an

operational methamphetamine laboratory.

Baker admitted that she knowingly made her apartment at 2939 Leeway Dr. available for the purpose of unlawfully manufacturing, storing and distributing methamphetamine.

Loftus admitted that she knowingly made her residence at 3406 Range Line, which she shared with **Acison**, available for the purpose of unlawfully manufacturing, storing and distributing methamphetamine.

Merritt was arrested on July 12, 2003. Law enforcement officers, after receiving information from a local Wal-Mart security guard regarding the purchase of acetone and glassware, searched **Merritt's** apartment. According to Graves, they found numerous items commonly used to manufacture methamphetamine, including glass jars containing various liquids and sludge, numerous blister packs of pseudoephedrine and lithium battery casings. Just outside the apartment officers found numerous propane tanks which smelled of anhydrous ammonia, empty blister packs of cold tablets, and other items also associated with the manufacture of methamphetamine. Officers also found Tupperware bowls, jars and plastic bags containing methamphetamine in the apartment.

This case is being prosecuted by Assistant U.S. Attorney Jim Lynn. It was investigated by MUSTANG (the Mid-Missouri Unified Strike Team and Narcotics Group), the Boone County, Mo., Sheriff's Department, the Hallsville, Mo., Police Department, the Columbia, Mo., Police Department, and the Boone County, Mo., Fire Protection District – Hazmat Methamphetamine Response Team.
